

Introducing Lake Macquarie Organics compost products

REMONDIS is a leading local producer of high quality compost products, with a track record spanning more than two decades.

REMONDIS Lake Macquarie Organics, at Awaba NSW, is a state-of-art resource recycling facility. Here we receive local food organics, FOGO and garden waste and then - using tunnel composting technology - produce quality compost in various grades.

Our client base is diverse, including those in landscaping, agriculture (both intensive and broad acre), mines, vineyards and farming operations such as fruit and vegetable growing. With a loyal local following, we also ship to customers along the Eastern seaboard of Australia.

Features of REMONDIS compost

- Improves soil structure and stability
- Enhance soil fertility
- Promote beneficial microbial activity
- Enhance pathogen resistance
- Increase water retention reducing the need for irrigation
- Suppress weeds
- Improve temperature control
- Builds up humus and supports carbon storage in the soil

WORKING FOR THE FUTURE

Organic solutions for your soil

About REMONDIS Australia

Established locally in 1982, REMONDIS Australia is part of one of the largest recycling, service and water companies in the world.

As a family-run company and a leader in the delivery of environmental solutions, REMONDIS Australia has over 1,100 employees and 560 vehicles operating from our advanced facilities across Australia.

As one of Australia's leading recycling and waste management companies, we leverage our local knowledge and global expertise to serve more than 24,000 industrial and commercial customers throughout the country. By sharing our knowledge and expertise, diverting waste from landfills and supporting responsible waste management practices, we believe we can work together to bring the vision of a sustainable Australia closer to reality.
