1.0 Purpose

REMONDIS Australia Pty Ltd holds an Environment Protection Licence with the NSW Environment Protection Authority (EPA) for the transport of trackable waste licence Number 7356.

As per the Protection of the Environment Operations Act 1997 (the POEO Act), the holder of an Environment Protection Licence must prepare, keep, test and implement a pollution incident response management plan (PIRMP) that complies with Part 5.7A of the POEO Act in relation to the activity to which the licence relates.

If a pollution incident occurs in the course of an activity so that material harm to the environment (within the meaning of section 147 of the POEO Act) is caused or threatened, the person carrying on the activity must immediately implement this plan in relation to the activity required by Part 5.7A of the POEO Act.

A copy of this plan is kept where the activity takes place. The plan is made available on request by an authorised NSW EPA Officer and to any person who is responsible for implementing this plan. Parts of the plan is accessible on the REMONDIS Australia website and by providing a copy of the plan to any person who makes a written request. The sections of the plan that are required to be publicly available are set out in clause 98D of the Protection of the Environment Operations (General) Regulation 2009.

NOTE: This plan has been developed in accordance with the Protection of the Environment Operations Act 1997 and the Protection of the Environment Operations (General) Regulation 2009 and the Protection of Environment (Waste) Regulation 2014.

This Pollution Incident Response Management Plan (PIRMP) covers the key actions to minimise the occurrence of a pollution incident and manage a pollution incident if one occurs (during and after a pollution incident).

This document has been prepared for managing the impact to human health (employees and nearby neighbours) and the environment (onsite and offsite).

After hours Contact Number:	M. 0417513576
Email	helen.mccarthy@remondis.com.au

5.0 Notification to relevant authorities

As part of Part 5.7A of the POEO Act, in case of a pollution incident that causes or threatens to cause material harm to the environment, the relevant authorities are to be contact and include:

In addition, refer to additional contacts in Section 19

Notification of Relevant Authorities

Fire & Rescue NSE and/or Rural Fire Services	000 (first notification)
Environment Protection Authority	131 555
Health NSW – Local Hospital	Refer to 6.1

Notification of Relevant Authorities

SafeWork NSW	131 050
Local Council	Refer to 6.2
Sydney Water	13 20 92

6.0 Notifications to Neighbours & Local Community

Notification of Neighbours and the Local Community

Notification of Neighbours and the Local Community

The incident controller from emergency services (NSW Police Force or Fire & Rescue NSW) leads the local community notification.

Helen McCarthy must consult with the incident controller on what community notification, if any, should be undertaken.

- The information that must be provided includes;
- the time, date, nature, duration and location of the incident,
- the location of the place where pollution is occurring or is likely to occur,
- the nature, the estimated quantity or volume and the concentration of any pollutants involved, if known,
- the circumstances in which the incident occurred (including the cause of the incident, if known),
- the action taken or proposed to be taken to deal with the incident and any resulting pollution or threatened pollution, if known,
- other information prescribed by the regulations

Helen McCarthy has the overall responsibility for public communication during an incident.

7.0 Description of Likelihood of Hazards and Associated Risk Assessment

REMONDIS operates an Integrated Health, Safety, Environment and Quality Management System. Risk assessments are conducted based on the requirements of RE-HSEQ-ST-014 HSEQ Risk Management Minimum Standard.

A specific risk assessment for Environmental Protection Licence 7356 has been developed and is routinely updated. Please see a member of the Environment or NSW Management Team for a copy of this.

8.0 Pre-emptive actions to be taken

A specific risk assessment for Environmental Protection Licence 7356 has been developed and is routinely updated. Please see a member of the Environment or NSW Management Team for a copy of this.

An NSW Trackable waste procedure has been developed which outlines the pre-emptive actions taken by REMONDIS to minimise and prevent harm to human health and the environment arising from the transport of trackable waste.

9.0 Communicating with neighbours & the Local Community

Communicating with Neighbours and the Local Community

In the event of a pollution incident, REMONDIS will immediately contact the relevant authorities as per section 6. REMONDIS will follow their directives as to notifying the local community.

The following notification methods will include but not limited to: -

- Face to face contact
- Telephone to advise community stakeholders of the incident with recommended actions to prevent or minimise harm such as close doors and windows, evacuate buildings or premises, not to drink or swim in water courses
- Potentially affected community members will be determined based on the nature / scale of the pollution incident and the current weather conditions
- Follow up communications with the community stakeholders will be carried out by the REMONDIS General Manager.

Communicating with
Neighbours and the Local
Community

Further undertakings include but are not limited to the following: -

- Face to face contact
- Telephone calls
- Letterbox drops
- Publication of updates on the REMONDIS Website
- Emailing of updates
- Door-knocking

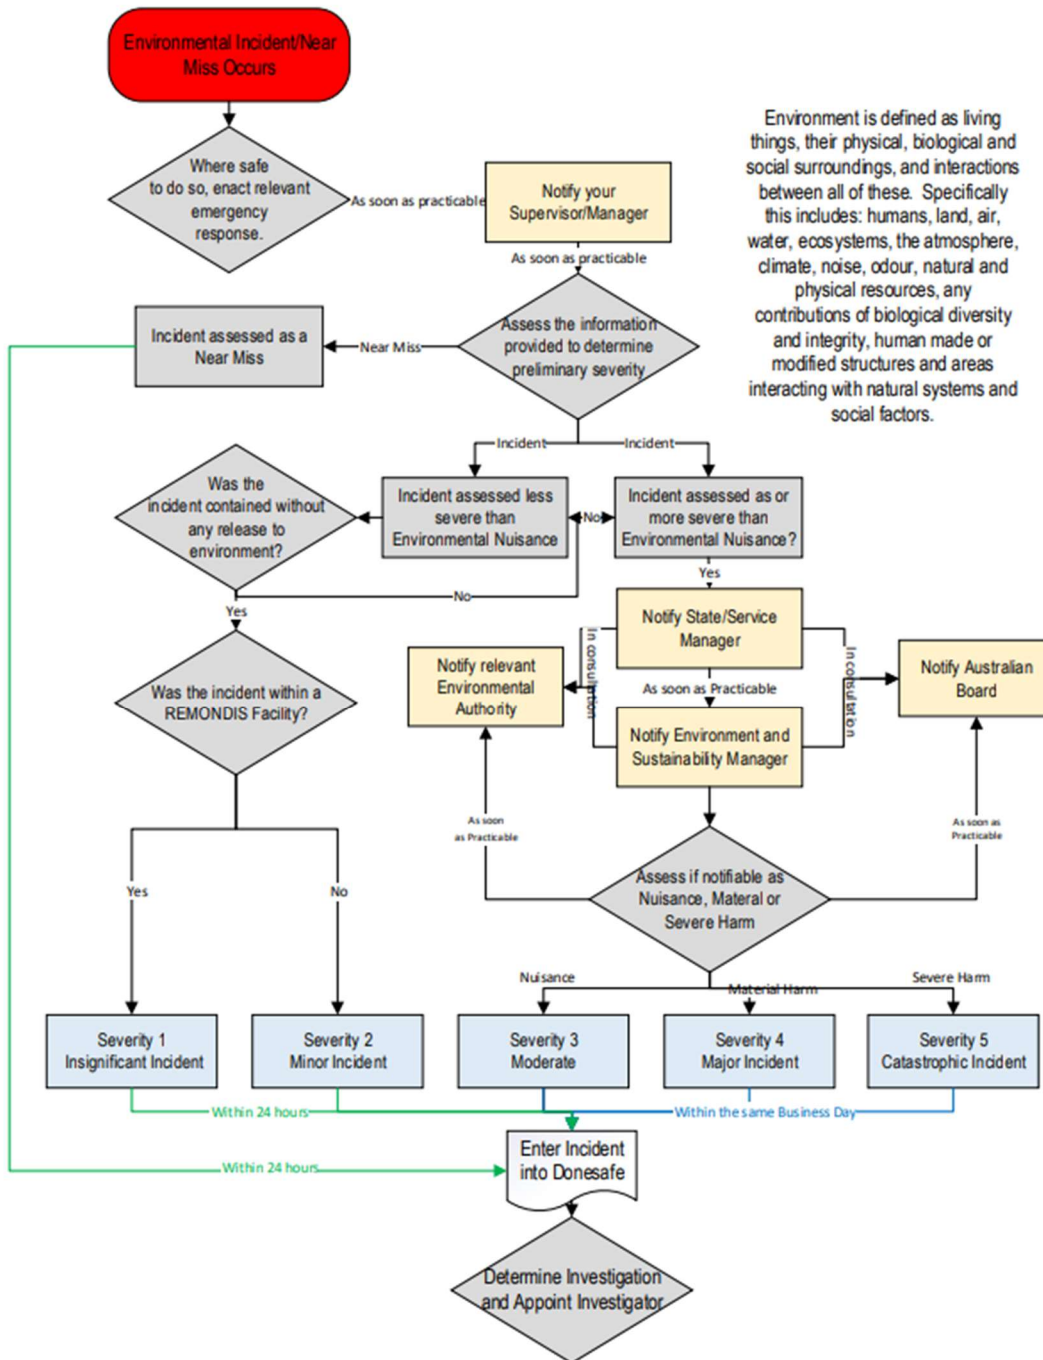

10.0 Actions to be Taken During & Immediately after a Pollution Incident

Actions to be taken during or immediately after a pollution Incident

Actions to be Taken During
or Immediately after a
Pollution Incident

All potential pollution scenarios and their expected response have been considered with the corresponding plan set out in Section 15.

11.0 Escalation Flow Chart

12.0 Coordinating with persons

Coordinating with Persons	
Coordinating with Persons	Licensees must notify all of the appropriate Regulatory Authorities/Neighbouring Facilities and potentially affected persons about the incident as set out in Section 5. The persons nominated in Section 4 are responsible for making contact with the identified affected parties.

13.0 Staff Training

Staff Training	
Staff Training	Nominated Staff will be trained in vehicle Emergency Management including enactment of the PIRMP. All operators will be provided Spill Management Training incorporating the use of truck spill kits.
Training Records	Records of employees being trained in the execution of the plan are retained in the site training matrix, training records folder, as well as personnel files.

14.0 Testing and updating of the PIRMP

Testing & Updating of the PIRMP	
Testing & Updating of the PIRMP	<p>It is a legal requirement to test the plan every 12 months and within 1 month of any pollution incident.</p> <p>The testing of the PIRMP is to be carried out in such a manner as to ensure that the information included in the plan is accurate and up to date, and that each plan is capable of being implemented in a workable and effective manner.</p> <p>Testing will involve undertaking desktop simulations of incidents and if necessary, completing exercises or drills. Testing will cover all the components of the PIRMP, including the effectiveness of the training.</p> <p>Internal auditing will also be undertaken by verifying data contained in it is accurate and competencies required by personnel are current</p> <p>Audit records are maintained on the BMS.</p> <p>In the light of that incident, whether the information included in the plan is accurate and up to date, and the plan is still capable of being implemented in a workable and effective manner.</p> <p>PIRMP Testing will be reported in Donesafe.</p> <p>Once the testing is completed, it is imperative that the PIRMP is reviewed and changes completed.</p>
Test Record	See Table 14.1
Availability of Plan	PIRMP available on website and on Donesafe

14.1 Details of Tests/Incident Response completed

Date Tested	Tested By	Details of Test	Findings of Test including issues Identified	Next Scheduled Testing Date (within 12 months from current test)
25-09-2020	T. Voss	Fire Emergency		15-07-2021
25-04-2022	Nicholas O'Donoghue including all operational staff	Hydraulic Oil spill in close proximity to Stormwater drain	In heavy rain diesel pits to be monitored and REMONDIS Vacuum truck services to be engaged as required.	25-04-2023
13-03-2023	Steven Hassett	Hot load entered site with Trackable Waste	Need to ensure radios available for two-way communication and conduct updated training with staff	13-03-2024

ERP 08	Electric Shock
ERP 09	Damage to Building Structure

EMERGENCY RESPONSE PROGRAM #01

MEDICAL EMERGENCY

The following information will help you assist person(s) that has a medical emergency.

Description:

A medical emergency is any event which has caused an injury / illness to a person requiring them to receive immediate medical attention beyond the skills of a trained first aid officer.

In the event of a medical emergency to a person follow the actions set out below:

1. Assess the situation for danger to yourself, the injured person and others in the area.
2. Call 000 and request an ambulance – follow all the operators' instructions and answer all questions clearly and calmly.
3. Inform the Chief Warden / Workplace Manager / First Aid Officer
4. First aid officer should commence first aid treatment on the person as soon as possible. Only trained first aid officers can render assistance.
5. Avoid moving the person unless necessary.
6. Nominate someone to assist with directing emergency services once they arrive and to ensure there is a clear path to the incident area.
7. Allow emergency services workers to access the injured person without interference.
8. The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #02

FIRE EMERGENCY

The following information will help you evacuate workers and visitors in the event of a fire.

R

Remove people from danger

Alert workers and make sure they are aware of the evacuation assembly area.
Check the evacuation route is clear of fire, smoke and other obstacles.

A

Alert all workers and raise the **Alarm**

If you see smoke, don't panic, remain calm.
Call 000 and ask for fire brigade.
Notify the Chief Warden / Other Area Wardens.

C

Contain the smoke and fire.

Close all the doors as you go (check the room to make sure all persons are out)
Attempt to extinguish the fire (only if you are trained to do so and you have a clear evacuation path)

E

Evacuate the building to a safe area.

Exit via the safest exit route.
Go straight to the evacuation assembly area (walk, do not run)
Report any missing persons.

Assist any disabled persons.

If they cannot self-evacuate relocate them to a safe place.

**EMERGENCY
ASSEMBLY
AREA**

Evacuation Procedure

Leave immediately by the nearest exit.
Proceed in an orderly manner to the assembly area.
Remain at the assembly area until all clear is given.

Important Notes

- Be aware that some worker will ignore the alarms and/or refuse to evacuate unless they see signs of danger – request the worker to leave a minimum of 3 times, if they still refuse to leave, evacuate and make note of the refusal to the emergency services / chief warden.
- Ensure all persons are accounted for at the assembly area.
- Persons should not re-enter the building / area until the all clear has been given.
- The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #03

FIRE IN A WASTE VEHICLE (HOT LOAD)

The following information will help you safely manage a hot load event.

1. Compact the load.
2. IMMEDIATELY notify your supervisor/manager
3. Where it is safe to reach a REMONDIS site, the Supervisor/Manager is to contact the Chief Fire Warden / Manager of that site to seek their agreement that the hot load can be driven there.
4. If there is no nearby designated hot load area, seek a safe location to pull off the main roads (carpark, vacant block, emergency stopping bays, etc).
5. Where possible, try to avoid any areas adjacent to waterways and/or drains.
6. Once at a safe location, commence ejecting the load. The truck should be driven away from the load, providing it is safe to do so.
7. Notify emergency services with the exact location.
8. If safe to do so, standing upwind, use the fire extinguishers or a hose (if available) to try to extinguish the fire, commencing with the truck, then the load.
9. Using the provided emergency triangles, establish an exclusion zone around the area and do not allow public to access.
10. Arrange for the transport of the fire debris, clean up the area.
11. The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Important Notes

- Only attempt to fight a fire if you are trained to do so.
- If hot load is on a RE site, all drainage from the area must be retained on site until assessed for disposal by the workplace manager.
- If it becomes obvious that there are risks associated with attempting to control the fire, evacuate the area immediately.

EXTINGUISH FIRE - only when safe to do so

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #04

TOXIC OR HAZARDOUS MATERIALS

If in the event of normal operations, suspicious materials are uncovered, the following should be implemented:

1. Cease work and evacuate work area IMMEDIATELY
2. Notify Chief Fire Warden or Manager
3. When applicable, notify relevant Authorities, emergency services or client
4. Isolate and barricade area as determined for the suspected material.
5. NO PERSON is to enter the barricaded area without wearing appropriate PPE and the express permission of the Manager
6. Monitoring and sampling of material is to be carried out by a suitably qualified persons to determine suitable clean up methods
7. Advise visitors and public to clear the area.
8. Once the area has been deemed clear operations can re-commence.
9. The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #05

SPILLS (oils, chemicals, fuels, etc)

Where any potentially hazardous chemicals or waste is spilled the following should be implemented:

In the event of a spill:

1. Notify Chief Warden or Workplace Manager and/or your Manager/Supervisor;
2. Isolate the area to prevent persons entering the area:
 - a. Assist affected persons, cooperate with the orderly evacuation to the assembly point;
3. Review the measures to prevent the spread of a spill and/or to clean the spill in relation to the chemical released.
 - a. If unsure or unknown, consult the relevant SDS, Section 6 includes accidental release measures and Section 8 the exposure Controls/Personal Protection Measures. Ensure all referenced controls, including PPE are available prior to proceeding.
4. IF SAFE TO DO SO, and from an upwind direction:
 - a. Restrict the spread of the spill (ie switch off the tap, stand container up, dam spill);
 - b. Contain the spill, prevent it from entering any waterways, drains, or environmental sensitive areas, using the supplied spill kit.
 - c. Clean up of the spill. For spills of significant volumes, a vacuum tanker may be required.
 - d. If spill spreads or area becomes effected by fumes/mists – leave area immediately and call emergency services;
5. IF NOT SAFE TO DO SO, call emergency services and follow the instructions given;
6. DO NOT re-enter effected area/building, until advised by the emergency services of Workplace Co-ordinator that it is safe to do so;
7. Advise visitors and public to clear the area to assembly point.
8. Notify the Environmental Team as the spill may be required to be reported to the regulator.

The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #06

SEVERE STORM (lightning & thunder, high winds, hail)

Description:

The Australian definition of a "severe thunderstorm" is one which produces any of: **Large hail - 2 cm diameter or greater. Damaging wind - 90 km/h or greater. Tornadoes. Heavy rainfall conducive to flash flooding.**

General precautions:

1. Do not remain in or use any mobile plant.
2. Stay inside buildings at all times. Avoid small structures and keep clear of windows.
3. If driving, slow down or park away from trees, power lines or other objects that may be fallen due to storm damage.
4. Stay inside the vehicle. Discard all metal objects.

If shelter is not available:

1. Make yourself a small target. Crouch or squat with your feet together. Preferably try to find a hollow to crouch in.
 - Keep your hands off the ground
 - Spread groups of workers out (do not contact each other)
2. Remove any metal objects from your body.
3. Do not lie down. (The more in contact with the ground, the more lightning will be attracted to you)
4. If your hair stands on end or you hear buzzing on nearby rocks, fences, etc move immediately.
5. Stay away from high and low points (hilltops and ridges or gullies, creeks) rock overhangs or shallow caves.
6. Keep out of and away from bodies of water.
7. Never shelter under trees.

First aid for lightning victims

Apply immediate CPR to victims until emergency services arrive. You will not receive a shock from the victim. Immediate assistance is vital.

In the event of a Severe Storm follow the actions as set out below:

1. Move workers indoors. If outdoors, workers must take extra precaution to avoid hazards such as flooded roads, downed electrical power lines, utility poles and trees.
2. Chief Warden to advise all workers via two-way radio and provide actions to take.
3. Avoid driving during severe storms wherever possible.
4. Close all windows, curtains, blinds and external doors.
5. Remain inside a building during the storm, keeping away from exposed windows.
6. Move computers and valuables away from windows or items that may fall.
7. Turn off electrical appliances and unplug them from wall sockets where possible.
8. Be aware that lightning strikes may cause power failure which will affect services such as lighting, lifts, heating or air conditioning, ventilation and building fire systems.
9. In the event of damage to the building, seek shelter under tables or desks and away from items such as machinery and other objects that may fall or slide. In multi-story buildings, the central core is usually the safest place to seek refuge.
10. Refrain from using the telephone during thunderstorms.
11. Chief Warden to announce when the storm has passed and the plan for the remainder of the day.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #07

DAMAGE TO UTILITY SERVICES

The following information will help you assist you if there is damage to any external utility services.

Description:

Any damage to a utility service ie. Gas, water, electricity, telecommunications, etc

Should electricity, gas, water or telecommunications services be pulled down or damaged, the following is to be carried out:

- STOP work IMMEDIATELY.
- Advise the chief warden or workplace manager
- Assess the situation – make decision on action (evacuate or not)
- Raise alarm – (if evacuation is required)

If it is SAFE TO DO SO:

- Inspect work area.
- Isolate service if appropriate.
- Notify Emergency Services and utility service provider
- Isolate immediate area and barricade if possible.
- Advise visitors and public to clear the area.

The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Should an item of plant or vehicle come into contact with overhead power lines, the following should be observed:

- Try to break the plant / vehicles contact with the energised overhead electric line – move the equipment to a safe area only if safe to do so.
- If not possible to break the contact, the operator / driver should remain inside the cabin of the plant.
- Contact the electrical supply authority immediately to isolate the electricity to the power line.
- The operator should remain in place until the electricity has been isolated and the all clear given by the electrical authority.
- If it is essential for the operator/driver to leave the cabin because of other danger (ie fire) then they should jump clear of the equipment.
 - Do not touch the equipment and the ground at the same time.
 - The operator should hop or shuffle away from the equipment with both feet together until at least 8 metres from the nearest part of the plant.
 - Do not run or walk from the equipment as voltage gradients passing through the ground may cause electricity to pass through the body.
- Warn all other persons in the area and try to keep them at least 8 metres from the plant.
- Unauthorised equipment or persons should not attempt to rescue a person receiving an electric shock.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #08

ELECTRIC SHOCK

The following information will help you assist person(s) that has received an electric shock.

Description:

Electric shock may stun a person, stop their breathing and cause severe burns to skin and internal organs. Injuries can be fatal.

In the event of an electric shock to a person follow the actions set out below:

1. Avoid direct contact with the affected person while they are in contact with the electrical current.
2. Break the contact by switching off the current if possible, or by contacting service provider.
3. For low voltage only (<1000 volts): If the above action is not possible, stand on something dry (blanket, rubber mat, newspapers) and break the contact by pushing the affected person free with a wooden pole or board, or pulling with a loop of rope around an arm or a leg.
4. Do not use any materials that conduct electricity (e.g. metal) or anything wet.
5. Inform the Chief Warden / Emergency Co-ordinator / First Aid Officer
6. Call Emergency Services on 000.
7. Only permit first aid when the situation is safe, electrical source has been isolated or person removed from the electrical source
8. Affected person must be attended to by a first aider
9. Always seek medical advice after an electric shock.
10. The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.

EMERGENCY RESPONSE PROGRAM #09

DAMAGE TO A BUILDING (STRUCTURAL)

Description:

Any damage to a building that could impact the structural integrity of the building. For example, cracks in walls, water damage, leaning walls, buckling of beams, collapse of the structure / roof / ceiling.

In the event of such damage to a structure the following should be implemented:

Where there is a potential of total or partial collapse:

1. Notify the workplace manager / chief warden
2. Evacuate persons in the vicinity of the damage.
3. Keep away from the area until it has been assessed.
4. Isolate the area.
5. Isolate any utility services ie electricity, water, gas
6. Advise all workers of the restricted area and not to venture into this area.

Where there little to no risk of a collapse, but possibility of objects falling:

1. Notify the workplace manager / chief warden
2. Isolate the area
3. Advise all workers of the isolation of that particular area
4. Arrange repairs and keep area isolated until they are undertaken.

The Workplace Manager must ensure that the incident causing the emergency is reported and investigated according to the Hazard & Incident Reporting Minimum Standard. RE-HSEQ-ST-015.

Emergency Services 000

Under no circumstances should you put your life in danger in attempting to deal with an emergency.
